Luis Fernandez

Game Developer

About Me

I'm a **game developer generalist** with a strong foundation in programming and experience in 3D production and UI/UX. I combine gameplay programming with an understanding of art and design to build reusable systems and responsive player experiences.

Selected Game Projects

Toy Tournament - Lead Game Developer
University of Florida | 2026 | 2-person team

- Programmed all gameplay and functional UI for a 2-4 player local multiplayer party game featuring three distinct minigames.
- Built a reusable local multiplayer framework and camera system that supports dynamic player joining, independent input, and lobby controls.

CapyBun Dungeon Adventure - Lead Game Developer
University of Florida | 2025 | 6-person team

- Implemented all gameplay mechanics and functional UI for a puzzle adventure where players switch between two characters to overcome obstacles and reunite to escape together.
- Built character switching, puzzle interactions, camera transitions, inventory, and connected individual mechanics into a playable experience.

Elemental Escape - Solo Game Developer
University of Florida | 2025

- Independently developed a 3D elemental puzzle game, handling programming, game and level design, asset integration, and UI implementation.
- Built elemental mechanics that let players burn obstacles and freeze objects to solve puzzles and progress through the game.
- Programmed a multi-phase dragon boss encounter with projectile attacks and a cinematic introduction.

Skills

Programming: C#, C++, Python, Java, JavaScript, Lua, HTML/CSS

Game Engines: Unity, Unreal Engine, Roblox Studio

Development Tools: Git/GitHub

Art & Animation: Blender, Maya, Substance Painter, Photoshop, After Effects, Premiere Pro, Toon Boom

Game Development Expertise

- Gameplay programming and modular, reusable systems
- Inventory, player controllers, and camera systems
- Local and online multiplayer systems
- UI/UX implementation, responsive feedback, and game feel
- Puzzle mechanics, enemy behavior, animation states
- Object-oriented programming & design patterns
- 3D asset production and engine integration
- Mathematics & physics for gameplay mechanics
- Data persistence and player progression

Languages

- English
- Spanish

Education

B.A Digital Art and Sciences
University of Florida - 2026
